MULTI-SYSTEM CLEANER & LUBRICANT

KEY BENEFITS

When added to fuel:

- Cleans and lubricates the entire fuel system from the tank to injectors
- Removes harmful deposits on intake valves and cylinder heads
- Lubricates the upper cylinder walls as well as the compression rings and oil rings
- Contains special Lucas additives that cause the fuel to burn thoroughly for fewer exhaust emissions and more MPG
- COUNTERACTS THE CORROSIVE EFFECT OF ETHANOL IN FUEL

When added to engine oil:

- Improves engine cleanliness - reduces gum and varnish, especially in oil burners
- Reduces friction and wear
- Improves cold temperature fluidity
- Helps extend oil life

MultiFIT®

WHEEL BALANCE WEIGHTS

MultiFit® weights come in larger box sizes to help reduce inventory reordering

Series 63 features a 3-year proven powder coating for corrosion protection

Works on most **AW SERIES** **MC SERIES** **IAW SERIES** **EN SERIES** **FN SERIES** wheels.

Note that it does not work on LH-Series wheels - use an adhesive weight.

A new non-lead alternative designed for the aftermarket

Made from high quality zinc material making installation and removal easier

Works on most **P SERIES** **T SERIES** wheels.

POWERSTOP®

EXTREME PERFORMANCE BRAKE SYSTEMS

The Z17 Evolution Plus product line combines our performance proven Z16 Evolution Ceramic pads with application specific brake hardware kits. Each hardware kit will include stainless steel abutment clips (where applicable), anti-rattle hardware clips, piston clips or bushings and sleeves as required for installation.

If you drive in the hills, haul loads or tow trailers, you need the extra stopping power of Z36 Extreme Truck & Tow pads. Power Stop Z36 Carbon Fiber Infused Ceramic brake pads are made for trucks and SUV's with higher gross vehicle weights. The extreme pad bite offers superior performance to avoid high temperature brake fade. Z36 compound is a quiet and low dust formula that features a coefficient of friction 17% higher than OE pads.

Police officers have a tough job, so they need need tough brakes to hold up to the high temperatures that are experienced during pursuit driving. Power Stop's Z37 Top Cop Brake Pads are specifically designed with this purpose in mind. A high, stable coefficient of friction is crucial to confident braking, so we test all our formulations to the limit to make sure that they are up to the task.

The Euro-Stop™ brake kit is for those consumers seeking OEM level quality for a lot less than the cost from the new car dealer. The Euro-Stop™ Brake Kit is engineered to meet the strict European ECE-R90 standards ensuring OEM performance and safety. ECE-R90 is required for all replacement brake disc and linings sold throughout the European Union.

Power Stop drilled and slotted rotors give you the advantages of both drilled holes for cooling and slots to sweep away gas and dust. Power Stop rotors use only the finest blanks and feature G3000 grade castings from the best foundries. All drilled and slotted rotors (except for hub rotor assemblies) are silver zinc plated to resist rust. With a direct OE fit and vane count, there are no special modifications needed on your car, truck or SUV. The drilled and slotted design is our most popular performance rotor for street and day track applications.
